ROTISSERIE CHICKEN CONTAINER

A reservoir in the unit's base draws excess liquid away from the bird.

Vents in the lid allow moisture to escape efficiently.

See the Difference

Our Rotisserie Chicken Container ensures your chicken stays fresh, hot, and secure. But that's just the beginning. This innovative, two-piece, patented design features a crystal-clear, anti-fog polypropylene lid to make the contents look as mouth-watering as possible.

Leak Resistance

- Container closes easily—the base and lid audibly snap together, ensuring a tight seal.
- A precise lid-to-base fit helps prevent leakage of liquids at any temperature.
- Two additional seals on the unit's perimeter protect the package from popping open, preventing spills or grease burns to customers and employees alike.

Stacking Strength

- You can stack two containers securely because the top unit's base nests firmly into the lid of the unit below.
- While stacked, the containers remain strong and durable—even with prolonged heat exposure.
- Stacking containers means doubling the amount of product in your display unit, increasing your profit potential.

SIZES AVAILABLE

| Stock Number | Description | Dimensions LxWxH | Units Per Cases/Sleeve | Case Weight | Case Cube | Pallet TI/Hi | Cases/Pallet |
