RETAIL STOCK PRODUCTS
LEADING THE WAY IN SUSTAINABLE PACKAGING

Plan A is the leading-edge in environmentally conscious packaging solutions with our EcoStar® branded, FDA approved recycled PET material. All of Plan A’s stock clamshells made from PET are made using recycled resins.

Advantages of thermoforming:
- Low-cost tooling
- Quick and inexpensive prototyping
- Shorter production lead times
- Custom designs that are easy to modify
- Ability to produce both large and small parts
- Ability to produce parts with superior stress crack resistance, high impact strength, and good rigidity

Placon’s stock retail packaging is designed to maximize profit with packaging that enhances shelf impact, increases customer satisfaction and helps meet sustainability initiatives.

WHY PLACON?
- All Placon packaging and materials proudly made in the USA
- Family business with a commitment to quality
- More than 250 combined years of design experience with over 700 employees
- Single source for all of your stock, semi-custom and custom packaging needs
- Extensive product line with short lead times and no tooling costs for in-stock packaging
- Exceptional customer service

OUR FIRST CHOICE PACKAGING PARTNER

Placon’s stock retail packaging is designed to maximize profit with packaging that enhances shelf impact, increases customer satisfaction and meets sustainability initiatives.

WHAT’S THERMOFORMING?
- Thermoforming is a process that involves heating a flat sheet of plastic until it is soft enough to mold. Once it reaches the right temperature, the sheet advances to the form section. The sheet is pulled into the mold with a vacuum. The plastic hardens and forms the desired part. The molded plastic parts are then trimmed and inspected for quality.

Advantages of thermoforming:
- Low-cost tooling
- Quick and inexpensive prototyping
- Shorter production lead times
- Custom designs that are easy to modify
- Ability to produce both large and small parts
- Ability to produce parts with superior stress crack resistance, high impact strength, and good rigidity

Placon Core Capabilities:
- Design
  - High-quality packaging design with internal tool design & build
- Prototyping
  - Rapid prototyping for quick sample packaging
- Thermoforming
  - In-house extrusion and packaging production
- Quality
  - ISO 9001 and GMP (Good Manufacturing Practices) compliant with rigorous quality control procedures
- Materials
  - Sustainable packaging contains up to 100% post-consumer recycled content

Plan A Core Capabilities:
- Design
  - Custom designed parts for specific applications
  - Extensive product line with short lead times and no tooling costs for in-stock packaging
- Prototyping
  - Exceptional customer service

STOCK RETAIL PACKAGING SOLUTIONS

Our experienced stock packaging team work with you to determine the right packaging for your product needs.

Please offer a wide selection of stock packages, as well as semi-custom and custom packaging options for a complete breadth of packaging solutions.

- Large number of shapes and sizes for every product type
- Packages over 7" or 7” height require vacuum, manual, and somewhat configuration
- High quality packaging that stands the test of time. Right out of the box, package securely closed and maintains product integrity for maximum time.
- Full reliability. If you need it, we’ll make it. If we have the part, we’ll find it.
- Packaging that allows for your unique sealing method including expansion tautening, electronic sealing and of course ultrasound
- Customization, easy open, easy close packaging that offers high product visibility
- BPA free in compliance with Food Standards Act of 2006

Our experienced stock retail packaging team will work with you to determine the right packaging for your product needs.

Placon offers a wide selection of stock packages, as well as semi-custom and custom packaging options for a completely individual packaging solution.

- Large number of shapes and sizes to fit every product type
- Packages sized from 1” to 14” long in square, round, rectangular and curved cavity configurations
- High-clarity packaging with superb hinge strength, tight seals to keep package securely closed and maximum visibility
- Semi-custom packaging options are available with minimum insert tooling fees and short lead times
- Packaging that allows for various sealing methods including wraparound labeling, ultrasonic welding and UV adhesives
- Cost-effective, easy open, easy close packaging that offers high product visibility
- Nestable for shipping and storage
- Quotes within 24 hours

Semi-Custom

Don’t see exactly what you are looking for? Let us design a semi-custom package for you. Choose one of our standard stock perimeter sizes and we’ll customize the cavity to fit your product.

[Minimum tool insertion cost to customize.]

For questions and samples, please contact us today at 1.800.541.1535 or via email at info@placon.com.
LEADING THE WAY IN SUSTAINABLE PACKAGING

Placon is an industry leader in environmentally conscious packaging materials with our EcoStar® branded, FDA approved recycled PET material. All of Placon's stock retail products made from PET are also safe for food contact.

Advantages of EcoStar™
• Low-cost tooling
• Quick and inexpensive prototyping
• Shorter production lead times
• Custom designs that are easy to modify
• Ability to produce both large and small parts
• Ability to produce parts with superior stress crack resistance, high impact strength, and good rigidity

OVER 50 YEARS OF THERMOFORMING EXPERIENCE

Placon is at the cutting edge of environmentally conscious packaging materials with our EcoStar® branded, FDA approved recycled PET material. All of Placon's stock retail products made from PET are also safe for food contact.

Advantages of EcoStar™
• Low-cost tooling
• Quick and inexpensive prototyping
• Shorter production lead times
• Custom designs that are easy to modify
• Ability to produce both large and small parts
• Ability to produce parts with superior stress crack resistance, high impact strength, and good rigidity

WITH OVER 50 YEARS OF THERMOFORMING DESIGN AND MANUFACTURING EXPERIENCE, YOU CAN TRUST THAT Placon's Award-Winning Design and Engineering Teams Will Deliver The Best Packaging Solution For Your Product No Matter What Industry You Are In.

WHAT IS THERMOFORMING?

Thermoforming is a process that involves heating a flat sheet of plastic until it is soft enough to mold. Once it reaches the right temperature, the sheet advances to the form section. The sheet is pulled into the mold with a vacuum. The plastic hardens and forms the desired part. The molded plastic parts are then trimmed and inspected for quality.

Advantages of Thermoforming:
• Low-cost tooling
• Quick and inexpensive prototyping
• Shorter production lead times
• Custom designs that are easy to modify
• Ability to produce both large and small parts

Placon's stock retail packaging is designed to maintain profit with packaging that enhances your product's presentation, increases your customer's satisfaction and meets sustainability initiatives.

Placon Core Capabilities:
• Design
  • High-quality packaging design with internal tool design & build
• Prototyping
  • Rapid prototyping for quick design development
• Thermoforming Solutions
  • In-house extrusion and packaging production
• Quality
  • ISO 9001 and GMP (Good Manufacturing Practices) compliant with rigorous quality control procedures
• Materials
  • Sustainable packaging contains up to 100% post-consumer recycled content

OVER 50 YEARS OF THERMOFORMING EXPERIENCE
Placon is at the cutting edge of environmentally conscious packaging materials with our EcoStar® branded, FDA approved recycled PET material. All of Placon’s stock retail products made from PET are also safe for food contact.

Recycled PET packaging offers crystal clear clarity, high-quality strength and performance. Using EcoStar post-consumer material with 50% minimum recycled content meets the demanding sustainability requirements of today’s top retailers while helping to keep more than 1 billion plastic bottles from entering landfills each year.

Placon’s stock retail packaging is designed to maximize profit with packaging that enhances shelf impact, increases end customer satisfaction and meets sustainability initiatives.

Why Placon?
• All Placon packaging and materials proudly made in the USA
• Family business with a commitment to quality
• More than 250 combined years of design experience with over 700 employees
• Single source for all of your stock, semi-custom and custom packaging needs
• Extensive product line with short lead times and no tooling costs for in-stock packaging
• Exceptional customer service

Semi-Custom
Don’t see exactly what you are looking for? Let us design a semi-custom package for you. Choose one of our standard perimeter sizes and we’ll customize the cavity to fit your product.

Semi-Custom options include:
• Large number of shapes and sizes to fit your product format
• Tooling costs over $2,000
• Custom interior and exterior configuration
• High clarity plastic and printed/embossed sheet
• Custom interior decoration with environmental packaging
• Tooling for semi-custom products
• Exceptional customer service

**BlisterBox® Compartment Box**

- The perfect reusable container for small, single or multiple items.
- Use a pressure-sensitive wraparound label or a graphic insert card.
- ThisBox® Graphic Card Corner Radius:
  - PET except where noted.

**Suggested Uses:**
- Dental Kits, Hobbies & Crafts, Medical Test kits, as well as various graphic card options for the front of BlisterBox®
- BlisterBox® Curved Front Box
  - Increased graphic length due to the arc of the package.
  - Increased graphic area allows for visible billboard effect.
  - Can be printed as a customised insert card.

**Unique** curved front of the package gives a custom look and feel for your product. Packaging can hang or sit upright on a shelf.

* Made to order. Requires minimum order quantities and lead time.

** Only available in PVC material.

---

**BlisterBox**

The perfect reusable container for small single or multiple items. A low profile container optimized to provide a good view of the product while changing graphic cards in place on three sides. The BlisterBox is available in various materials, Finishing holes, Finish options, Bottom & Lids.

**BlisterBox Compartment Box**

Ideal for components associated with all items. Bottom & lid with graphic card in place on three sides. The BlisterBox Compartment is available in various materials, Finishing holes, Finish options, Bottom & Lids.

**ThisBox**

Create extra value for your product by packaging in our ThisBox. The ThisBox is available in various materials, Finishing holes, Finish options, Bottom & Lids.

**CurvedBox**

Gives a curve to items that require eye-catching appeal. The CurvedBox is available in various materials, Finishing holes, Finish options, Bottom & Lids.

**BlisterBox Heavy Duty**

For products that need to be held and view, use one of our BlisterBox Heavy Duty. The BlisterBox Heavy Duty is available in various materials, Finishing holes, Finish options, Bottom & Lids.

**GraphicBox**

For a product that need the best front and rear view, use one of our GraphicBox. The GraphicBox is available in various materials, Finishing holes, Finish options, Bottom & Lids.

---

**GraphicBox Round**

For a product that need the best front and rear view, use one of our GraphicBox Round. The GraphicBox Round is available in various materials, Finishing holes, Finish options, Bottom & Lids.

LEADING THE WAY IN SUSTAINABLE PACKAGING

Placon is at the cutting edge of environmentally conscious packaging materials with our EcoStar® branded, FDA approved recycled PET material. All of Placon’s stock retail products made from PET are also safe for food contact.

Advantages of Thermoforming:
• Low-cost tooling
• Quick and inexpensive prototyping
• Shorter production lead times
• Custom designs that are easy to modify
• Ability to produce both large and small parts
• Ability to produce parts with superior stress crack resistance, high impact strength, and good rigidity
